[Visual FoxPro 6.0 Portable.22](#)

```
1 to add visual foxpro language highlighter to notepad++ for editing prg based text files (modi file), this is
2 the method:
3
4 1-go to this page :http://docs.notepad-plus-plus.org/index.php/User_Defined_Language_Files
5 choose visual foxpro in the list and open the xml-download this file :
6 http://notepad-plus.sourceforge.net/commun/userDefinedLang/userdefinelang-visualfoxpro-jgoh.xml
7 save it as :userDefinedLang/userdefinelang-visualfoxpro.xml
8  this xml is defined for prg files exclusively.
9
10 modify the line
11 <UserLang name="Visual FoxPro" ext="prg" udlVersion="2.1">
12 with
13 <UserLang name="Visual FoxPro" ext="prg mpr h log mem txt xml " udlVersion="2.1">
14 to highlight other files opened with 'modi file' than prg.
15 can also make this line as:
16 <UserLang name="Visual FoxPro" ext="prg mpr h log mem txt xml htm html " udlVersion="2.1">
17
18 All this first etap is simplified in the xml file below (select and copy)
19 this file must be copied as:
20 copy file userDefinedLang/userdefinelang-visualfoxpro.xml yo addbs(getenv("appdata"))+"Notepad++"
21
22 in my system its the directory :C:\Users\youfsi\AppData\Roaming\Notepad++
23 re start notepad++and go to the menu---language...you see automatically visual foxpro...select it.
24 its all.
25  if you open any file (edited traditionally with visual foxpro editor with modify comm or modify file) with notepad++,
26 its edited and appears as vfp syntax colored.
27  if you choose in explorer any file as desribed above and click on "open with notepad++" its rendered with vfp
28 highlight syntax.
29
30 Main files concerned by "modify command" or "modify file" statement :
31 prg, mpr,h,mem.....you can add in xml file (first line): txt,html,htm,xml and so on.
32 you can configure notepad++ as described in previous article (main menu---parameters---preferences and set
33  for ex: si,gle instance,show menu or no,show toolbar or no,show tabs or no.....as convenience).
34
35 All this is working with notepad++ as external tool and preserving the native vfp editor.
36
37  but what if you want to make notepad++ as visual foxpro editor ?
38 this is described in next chapter2.
```

Rendering a txt file
